INSPECTION OF AGRICULTURAL, VEGETABLE, FLOWER, WILDFLOWER SEEDS,
AND WILD BIRD FOOD

The Nebraska Seed Law requires all agricultural, vegetable, flower, and wildflower seeds to be labeled before being offered for sale or sold in the state. Labeling must be complete and carry-over seed must be retested for germination each nine months (12 months for grasses) and relabeled accordingly. The person having the carry-over seed in their possession is responsible for having the seed retested and for relabeling.

Because of the nature of seeds, identical testing results are seldom obtained, but standard allowances have been established to compensate for these analytical variations. Seed lots are in violation when: (1) The difference between the "Labeled" and "Found" is greater than the tolerance permitted in the Rules for Testing Seeds of the Association of Official Seed Analysts; (2) The label does not contain information required by the Nebraska Seed Law or the Rules and Regulations; and (3) The seed does not meet the standards set in the rules.

Under Regulation 6, three enforcement orders are used in administering the provisions of the law. (1) A Stop Sale order shall mean that the products covered thereby cannot be sold until the order has been officially released. A Stop Sale order may be released on all agricultural and vegetable seed upon compliance with the terms of the act. An inspector may issue a release from a stop sale order when he is satisfied that: (a) The seed has been relabeled to comply with official test findings and a copy of the new label or tag has been furnished to the Department or (b) The seed has been reconditioned and retested or when (c) The seed has been returned to the supplier marked, NOT FOR SALE or similarly identified as not available to any purchaser by sale, trade, or exchange. (2) A Relabel to Comply order shall specify the relabeling required and the time within which it must be done, unless an extension or time is sought and obtained from the Department for good cause shown. (3) A Minor Violation warning order shall not require any specific actions to be taken, but shall constitute notice of deficiencies needing future corrective actions.

The Nebraska Seed Laboratory cooperates fully with the Federal authorities in the enforcement of the Federal Seed Act, which is administered by the Seed Branch, LSD, AMS, USDA. The act requires the complete and accurate labeling of all seeds shipped in interstate commerce. It also restricts the movement of seed from one state to another that contain noxious weed seeds in excess of amounts permitted by the law of the state into which the seed is being shipped and requires the listing of noxious weed seeds in the manner required by the state into which the seed is shipped.

Inspectors representing the Nebraska Department of Agriculture, travel throughout the state and draw official samples of seed as it is offered for sale or sold. These samples consist of field, lawn grasses, vegetable, flower, and wildflower seed. Official samples are tested in the State Seed Laboratory in order to determine if the labeling is accurate. Official samples of wild bird food are also sampled by inspectors under the Nebraska Commercial Feed Act and tested in the Nebraska Seed Laboratory for the presence of prohibited noxious weed seeds and insect contamination.
